

DISCOVER FLO CHARGING PLANS

An easy, flexible way to provide electric vehicle charging services to your tenants, employees or customers.

What is a FLO charging plan?

We're offering a turnkey package that allows property owners and managers to provide electric vehicle charging in their buildings while minimizing capital expenditures.

How do FLO charging plans work?

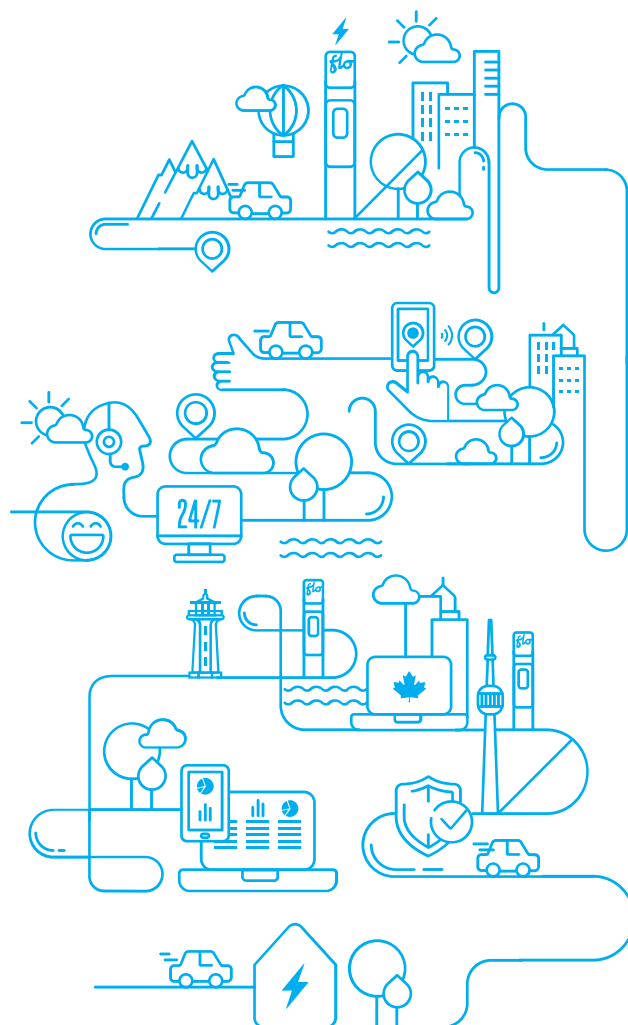

In exchange for an easy recurring monthly payment,¹ FLO delivers a complete charging service in your building. We install the stations, manage your charging service, and provide 24/7 support to charging station users.

¹ Requires a five-year contract with a minimum of two charging stations installed, one monthly payment per terminal.

Who are the FLO charging plans for?

FLO charging plans are ideal for anyone who owns or manages:

- Commercial real estate
- Apartment buildings
- Workplaces
- Stores and restaurants
- Fleet parking
- Public buildings

As a building owner or manager, how will you benefit?

A turnkey solution

We take care of everything — from installation to customer service for users.

Total peace of mind

We guarantee the seamless operation of your stations throughout our agreement, no matter what happens.

Full control over the service

You determine the access rules and fees for your terminals. And you earn a share of the revenue generated by your service.

When you choose a FLO charging plan, you become part of **Canada's largest electric vehicle charging network**, which offers more than 3,000 stations from coast to coast.

Real-time monitoring of the status of your stations

24/7 customer support

Visibility on the FLO website and mobile application (public stations only)

Also available for condominiums

FLO also provides charging plans for condominiums. We install and manage a charging infrastructure that allows each co-owner to subscribe to a dedicated charging station at his or her personal parking space.

- Fixed monthly fee billed directly to users
- Fee includes installation, electricity and maintenance
- No fees for residents who are not using the service
