

What are EV drivers' fast-charging habits?

Staying local

More than 30% of drivers report driving less than 200 miles per week.

Public charging is necessary

29% of the EV owners do not have a home charger.

Charging time is not idle time

51% of EV drivers engage with on-site amenities including eating and shopping.

FLO surveyed almost 40,000 EV drivers in the U.S. and Canada on EV drivers' charging habits and the activities they regularly engage in while charging.
